PROFESSIONAL SUMMARY

Dedicated and detail-oriented IT Officer with a strong background in managing network infrastructure, system administration, and technical support. Proven track record in maintaining network security, configuring hardware and software solutions, and ensuring minimal system downtime. Exceptional problem-solving skills with a commitment to aligning IT operations with organizational goals and delivering seamless technical support.

WORK EXPERIENCE

IT Officer — WASS ELECTROMECHANICAL WORKS

13/01/2025 – Present | Addis Ababa, Ethiopia

- Manage and maintain the organization's IT infrastructure, including computers, servers, network devices, and software systems.
- Provide technical support and troubleshooting for hardware, software, network, and system-related issues.
- Install, configure, and maintain LAN/WAN networks, internet connectivity, and wireless communication systems.
- Administer and monitor CCTV surveillance systems, access control systems, and other security technologies.
- Prepare technical specifications, compliance sheets, and documentation for bids and tender submissions.
- Participate in the design, supply, installation, testing, commissioning, and maintenance of ICT and security system projects.
- Monitor system performance and recommend improvements to enhance operational efficiency.
- Support project planning, implementation, and quality assurance activities for electromechanical and ICT projects.
- Collaborate with project teams to ensure successful delivery of CCTV, networking, and technology integration projects.
